

Name: _____

STUDENT QUIZ

Soundcheck

Take this short quiz to test your knowledge.

1) Why is it difficult for sound engineers to check volume levels before a concert when there are no people in the venue?

2) What does it mean when tours with two complete stage setups “leapfrog” each other?

3) Who manages the levels of the speakers aimed at the artist (or their in-ear devices)?

4) What does FOH stand for?

5) What is one negative effect caused by resonant frequencies in a venue?

6) Who manages the sound that the audience hears at a concert?

7) Essentially, mixing engineers try to create a _____ on which to build the show's sound.

8) What does it mean for an FOH mixer to “ring out the room?”

9) Why does every performer need a different mix of sounds on stage?

10) What are the two sonic environments represented by large concerts?
